PLATFORM OVERVIEW

All-Source. All-Domain. All-Horizon.

A confidential 2-page overview of the multi-intelligence platform built for sovereign entities.

THE OPERATIONAL REALITY

Three structural shifts have collapsed the response window from days to seconds:

- Speed: Adversaries move at machine speed — disinformation propagates across languages in minutes, crisis windows have compressed to sub-hour.
- Volume: 500M+ data points ingested per day across surface, deep, and dark sources — text, image, audio, video — in 50+ languages.
- Sophistication: State and non-state actors coordinate across domains. Deepfakes, AI-generated content, and synthetic personas are now commodity.

ENGAGEMENT MODEL

From briefing to pilot, typically 90 days.

We will tell you within 30 days whether we can move the needle. Mutual NDA is the starting point. We do not name clients. We do not write case studies without consent. Engagements are scoped to outcome, not headcount.

NEXT STEP
